

AMENDMENT TO THE SPECIFICATION

IN THE SPECIFICATION

Amend page 1, lines 1-6, of the specification as follows:

Title

ECCENTRIC GEARING

Cross-reference to Related Applications

This application claims priority under 35 U.S.C. 199(a)-(d) to German patent application number DE 10 2004 013 543.6, filed 03/19/2004.

Background Information of the Invention

Field of the Invention

The present invention relates to eccentric gearing for displacing two parts positioned in a manner that enables them to move relative to one another, ~~according to the general class of independent Claim 1.~~

Description of Related Art

Amend page 1, lines 24-27, of the specification as follows:

Advantages-Brief Summary of the Invention

The eccentric gearing according to the present invention ~~having the characterizing features of independent Claim 1~~ has the advantage that, by locating a stable fastening flange around a coupling element that interacts with the eccentric gear, it is possible to

IN THE SPECIFICATION

Amend page 2, lines 7-11, of the specification as follows:

Due to the measures listed herein in the subclaims, advantageous refinements and improvements of the invention features indicated in Claim 1 are made possible. If the fastening flange includes recesses which are designed, e.g., as openings in the flange, the gearing housing parts can be fastened to it, and the entire eccentric gearing can be fastened to one of the parts which move relative to each other.
